***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claims 13-18 and 20-30 are allowed over the closest reference, U.S. 2002/0128339 to Maisonnier *et al.*

The present invention is drawn to a process of obtaining a photochromic latexes comprising: preparing a mixture comprised of at least one organic monomer, at least one organic photochromic compound, at least one surfactant, and water, forming a miniemulsion of the mixture such that the dispersed droplets of organic phase have a diameter of 50-500 nm, adding a polymerization primer to the mixture before, during, or after forming the miniemulsion, polymerizing the reaction mixture and recovering the latex.

Maisonnier *et al.* discloses a method of preparing a photochromic latex comprising preparing an aqueous emulsion of at least one monomer Z and at least one photochromic chromene compound and polymerizing in the presence of water soluble initiator (*i.e.*, polymerization primer) to obtain the photochromic latex. There is no teaching of preparing a miniemulsion of the monomer mixture prior to polymerization.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
